LinkedIn :LinkedIn/YaheaDada

I'm a third-year Software Engineering student at Damascus University, specialized in building mobile apps with Flutter. I have strong experience with C++, Java, Git, and GitHub, and I've also explored game development with Unity and C#. I'm always looking for opportunities to learn, collaborate, and grow by working on real-world projects that make an impact.

EDUCATION

Damascus University
2022-2027

BSc in Software Engineering

Damascus University — Expected Graduation: 2027

PROJECTS

EasyRent

Real Estate Listing and Rental Platform

Allows users to explore, list, and rent properties. Features include property filtering, subscription plans, and Stripe integration for payments.
Reposetriy: GitHub/EasyRent

Habitly

Habit Tracker and Personal Growth App

Helps users build and track daily habits with calendar visualization, motivational tools, and personalized goals. Designed with a clean UI and responsive layout.
Reposetriy: GitHub/Habitly]

SpeedOrder

E-commerce Application in Flutter

A full-featured shopping app allowing users to browse, search, and purchase products online. Includes cart management, product filtering, and secure checkout. **Reposetriy**: GitHub/SpeedOrder
